Jim, Joey,

One more comment on the Bull and Pound TMDLs. Please remove the following sentence (found on p.ES-12 and p.104 of the Bull report, and p.ES-16 and p.126 of the Pound Report):

"The use of the alternative "settleable solids" compliance criterion will be allowed during the 2-year phased period, even though monitoring will also be required to characterize TSS concentrations occurring during these events."

Thanks.

Greg
